ø DATA RECEIVED TOO LATE TO BE INCLUDED IN DIVISION MEANS.

MONTHLY EXTREMES

Highest Temperature: 82° on the 19th at Rio Grande City 2 ESE

Lowest Temperature: -1° on the 28th at Stratford

Greatest Total Precipitation: 11.52 inches at Beaumont

Least Total Precipitation: 0.00 at Bravo

Greatest one-day Precipitation: 4.41 inches on the 7th at Deweyville

Greatest Total Snowfall: 8.3 inches at Plainview

Deepest Snow on Ground: 6 inches on the 28+ at Several Stations

See reference notes following Station Index.

MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(B) EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd, Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry. Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

See reference notes following Station Index.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd, Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

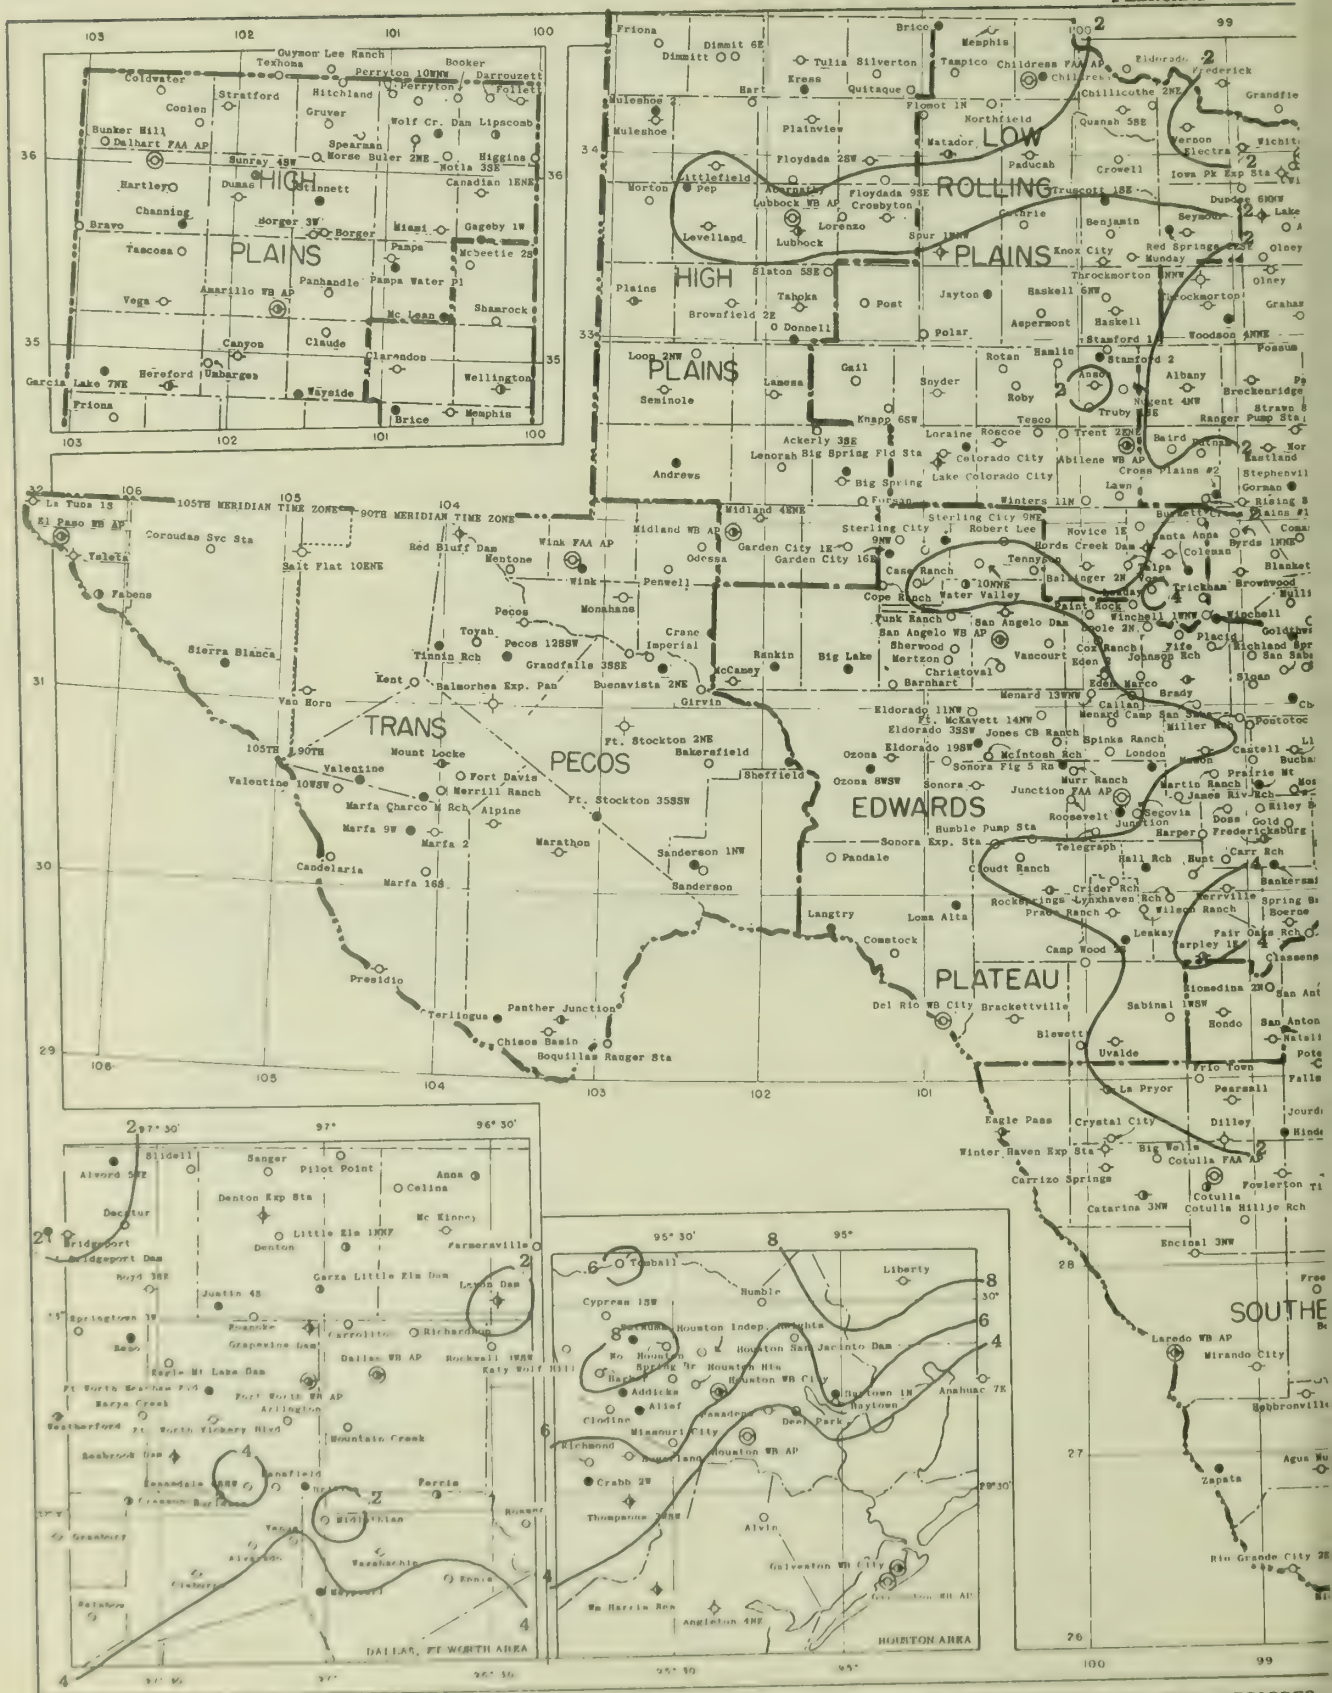
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

Ø DATA RECEIVED TOO LATE TO BE INCLUDED IN DIVISION MEANS.

MONTHLY EXTREMES

Highest Temperature: 100° on the 17th at Rio Grande City 2 ESE

Lowest Temperature: 14° on the 9th at Stratford

Greatest Total Precipitation: 10.37 inches at Center

Least Total Precipitation: 0.00 at Numerous Stations

Greatest one-day Precipitation: 4.08 inches on the 17th at Center

Greatest Total Snowfall: 20.5 inches at Perryton

Deepest Snow on Ground: 13 inches on the 31st at Higgins

See reference notes following Station Index.

[illegible] 72 INCH DIAMETER
[illegible] Evaporation Pan

One reference notes indicating Station Index

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd, Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

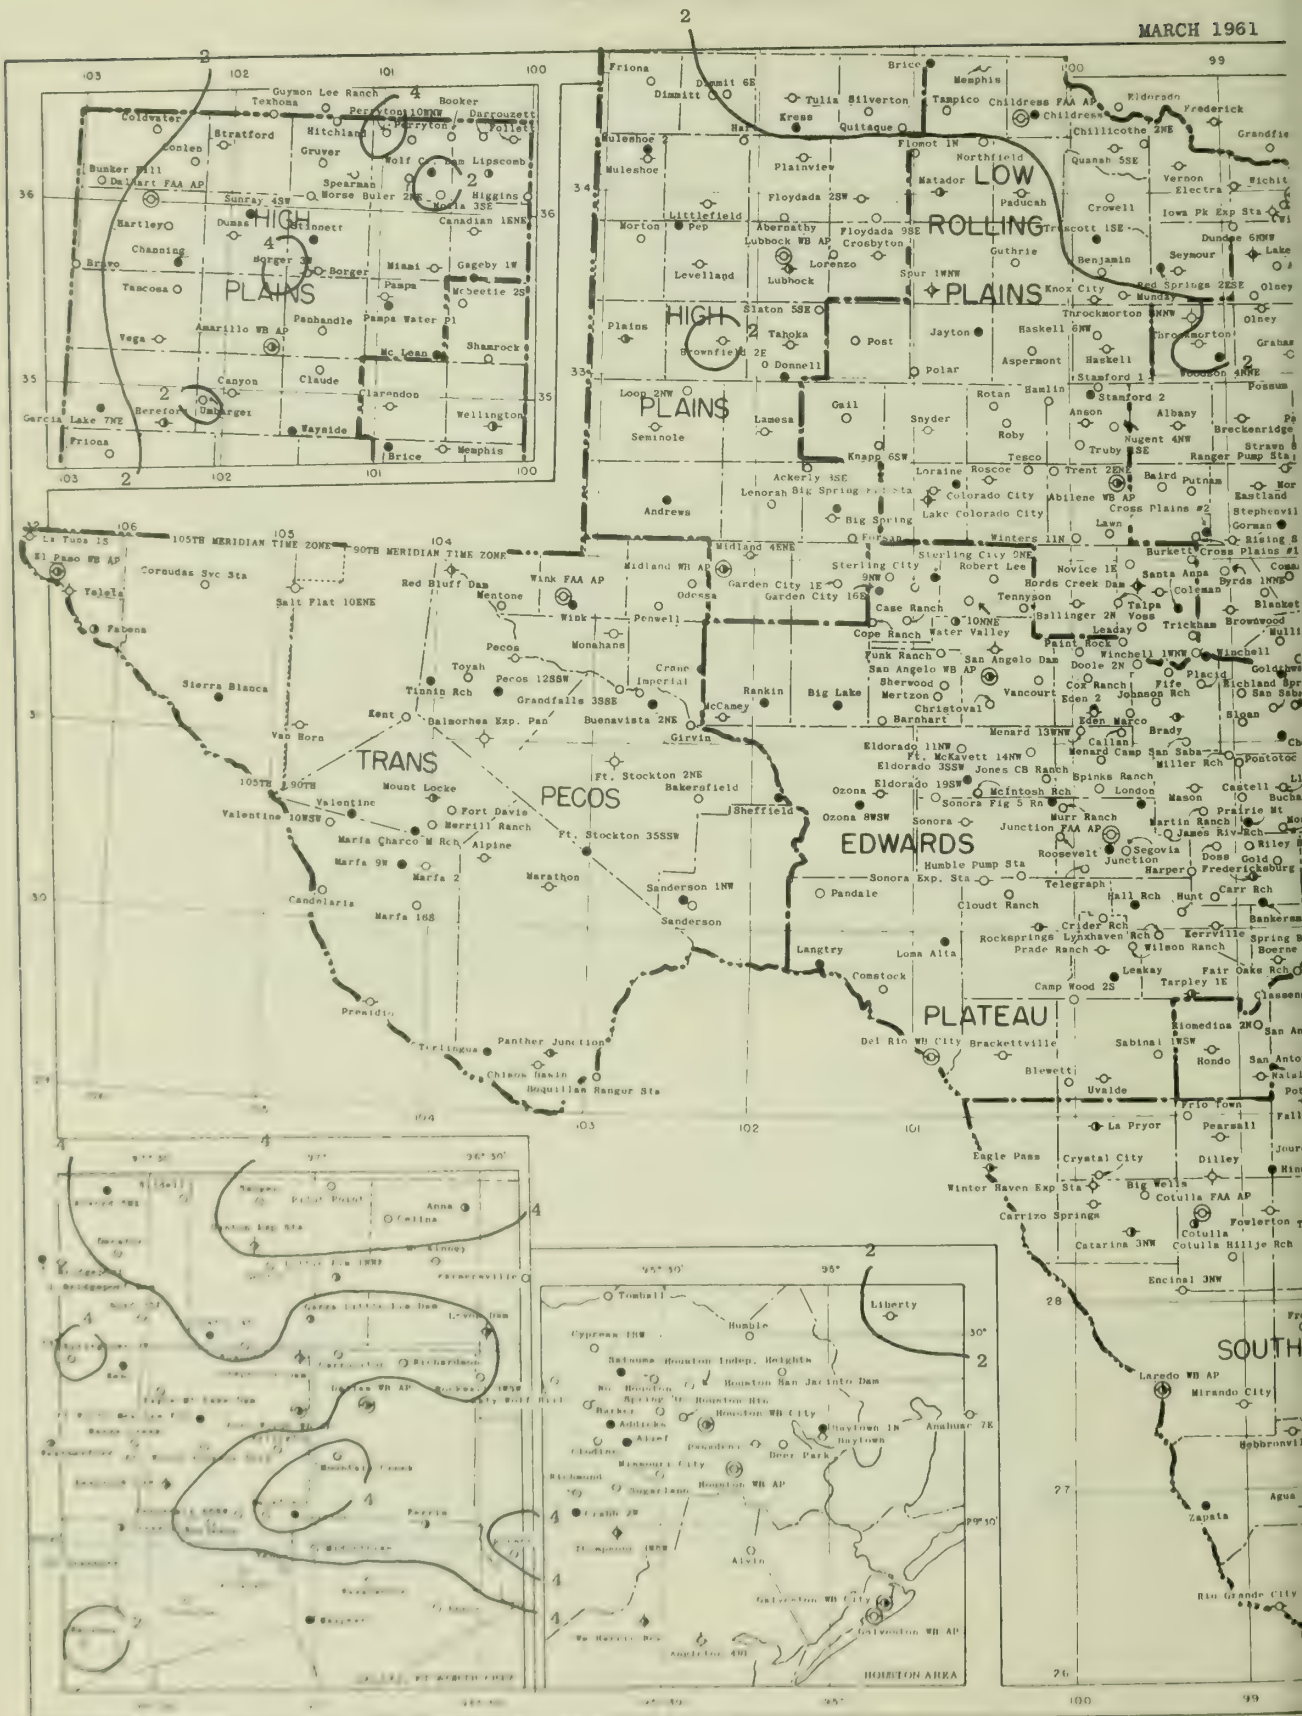
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

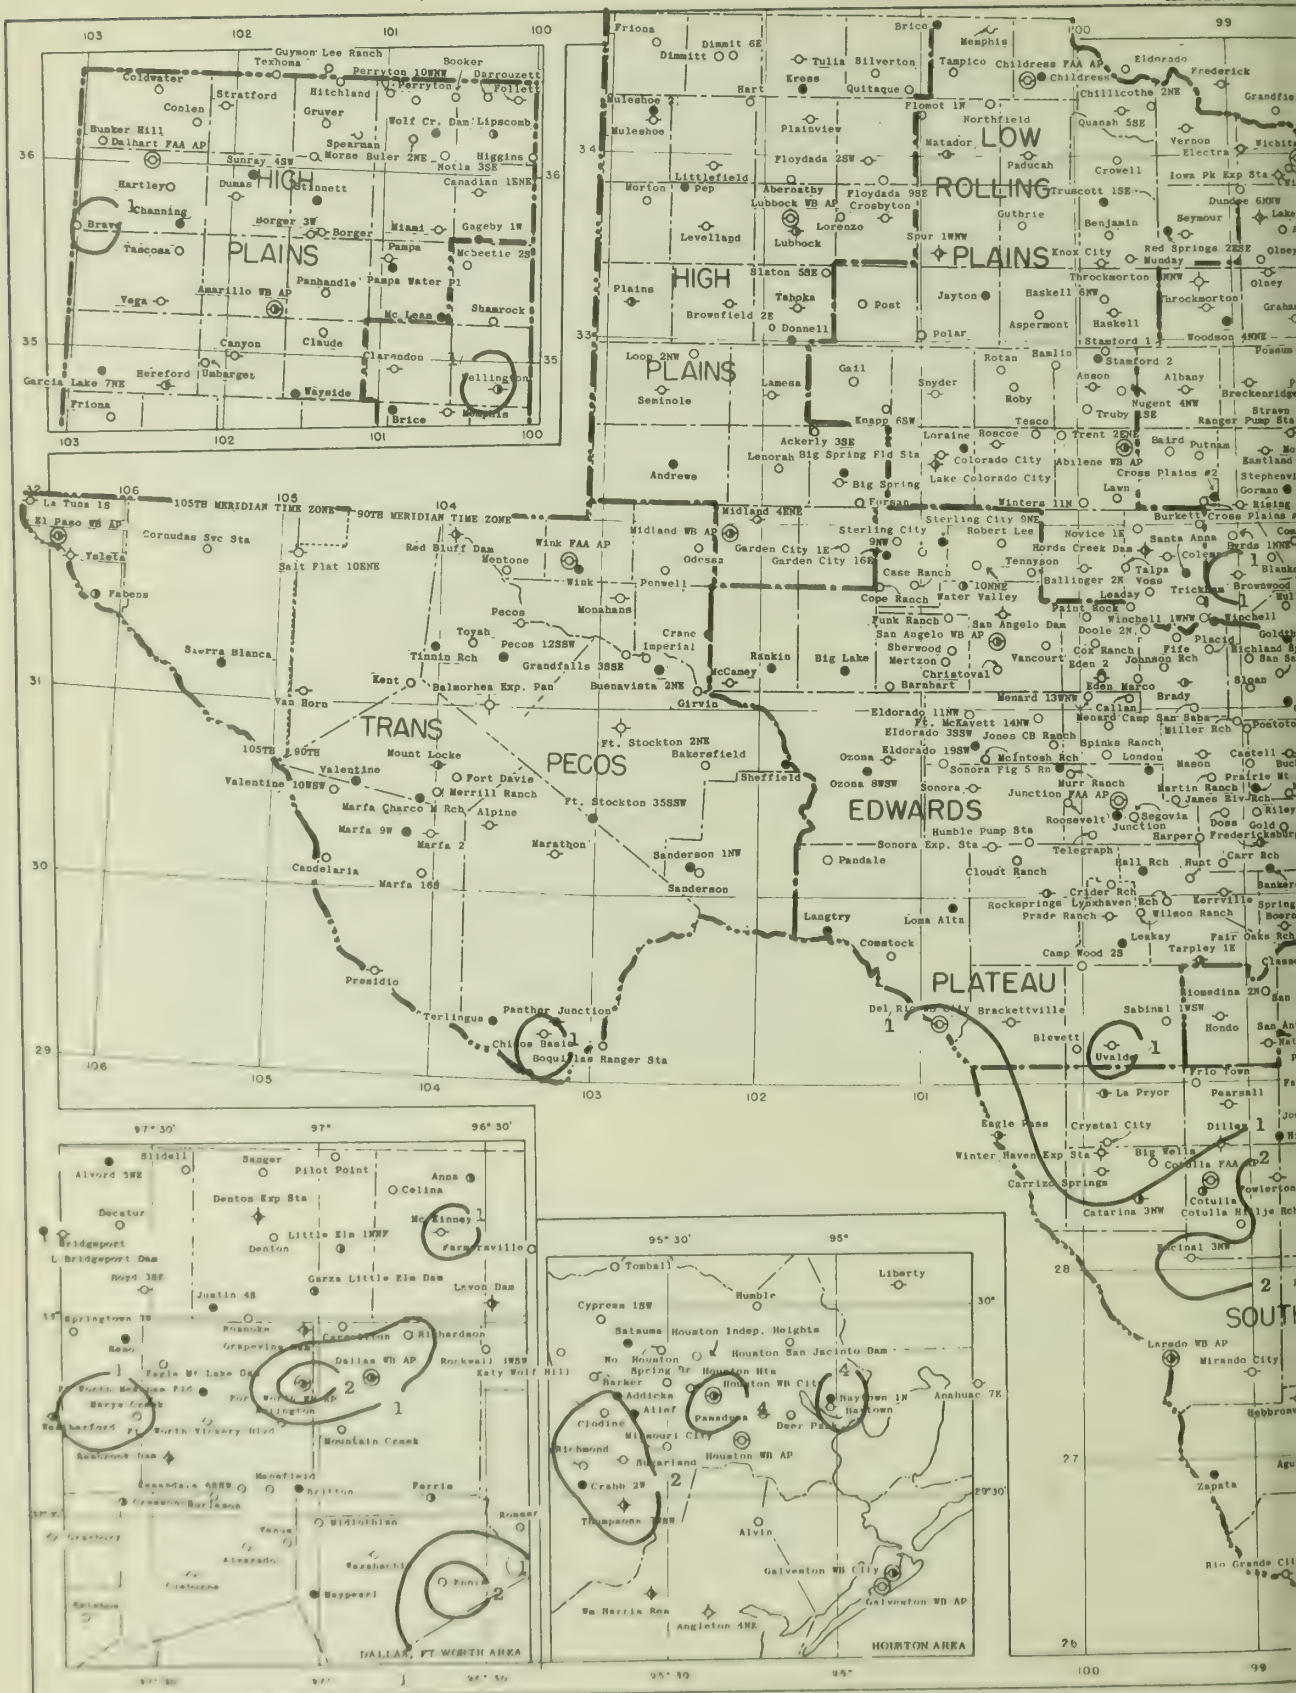
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

OTHER REFERENCE NOTES

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.



Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

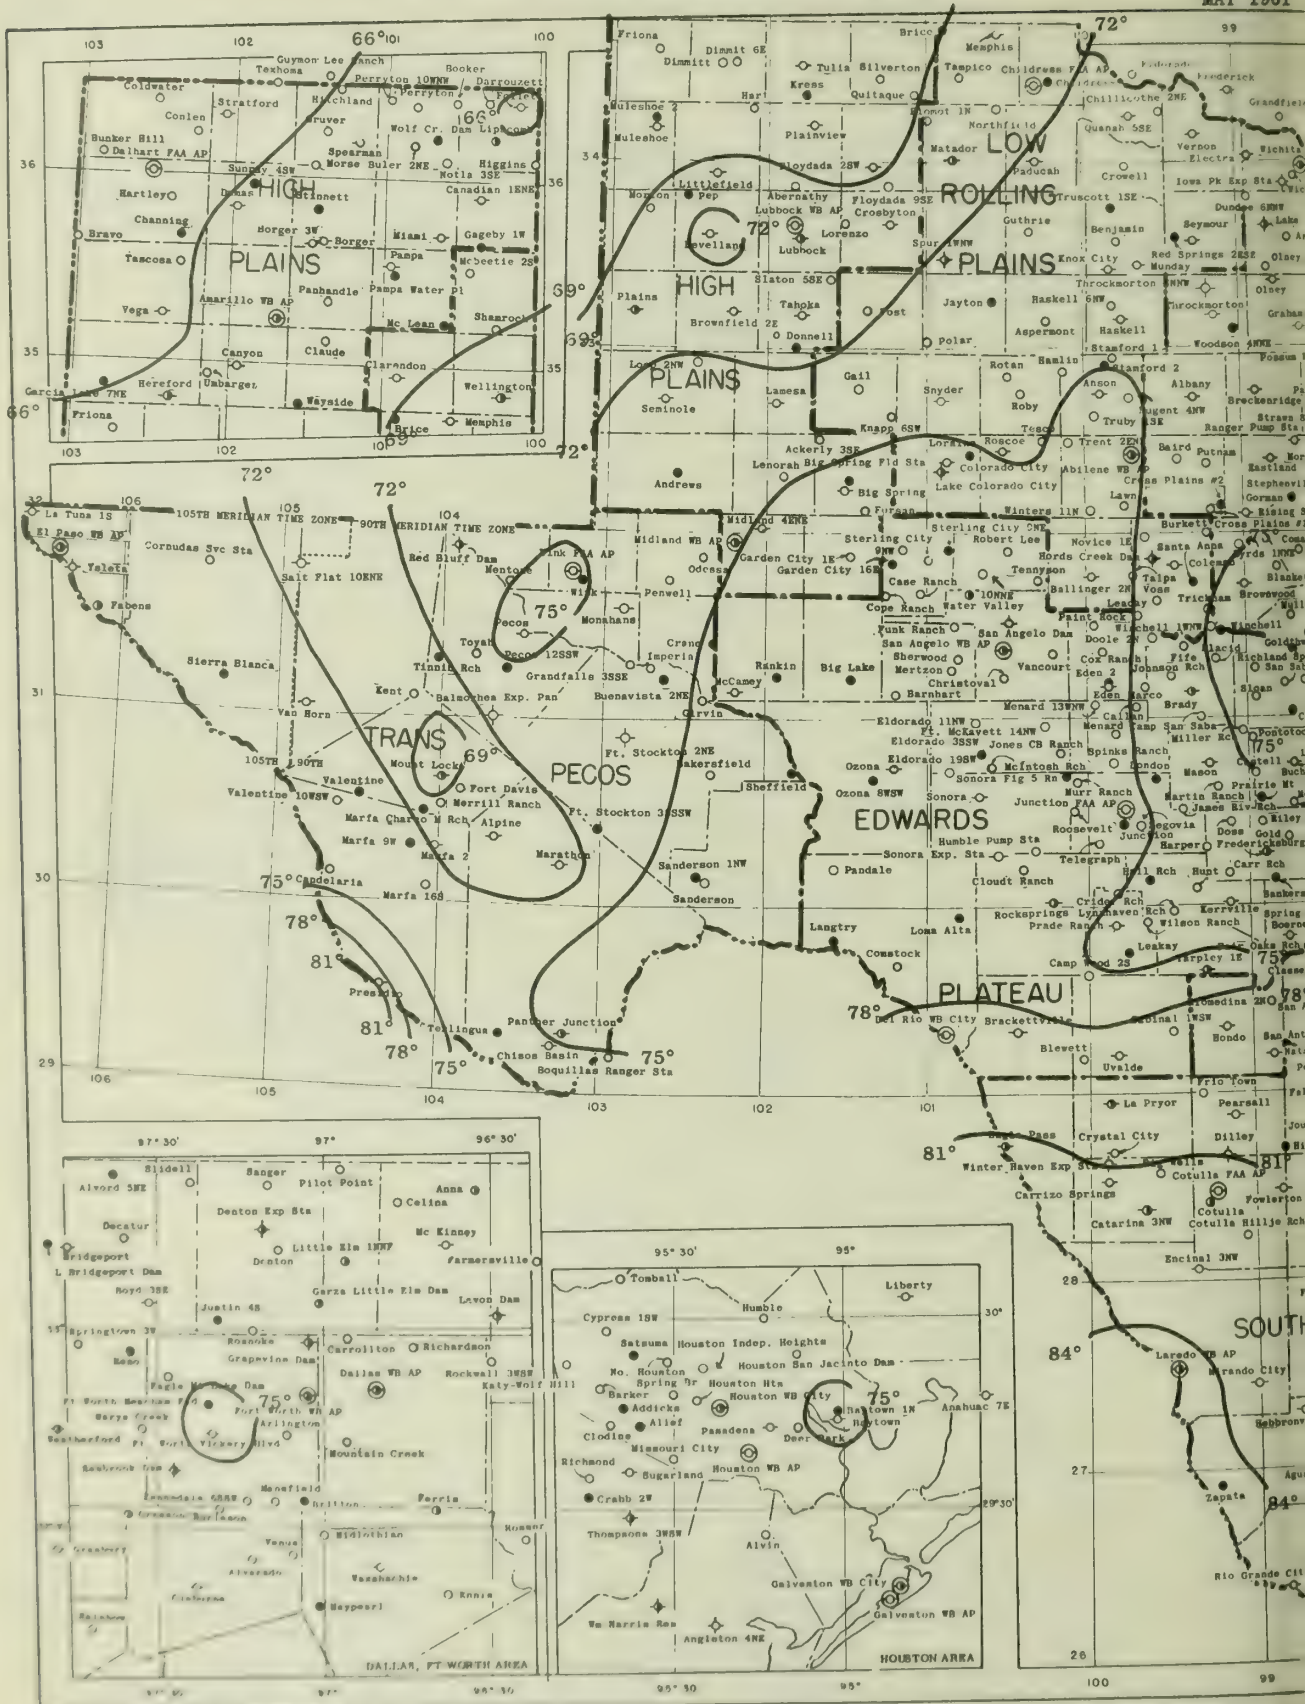
See reference notes following Station Index.

TOTAL PRECIPITATION

MAY 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER STATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

TOTAL PRECIPITATION



MAY 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

AVERAGE TEMPERATURE

MAY 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

AVERAGE TEMPERATURE

MAY 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

REFERENCE NOTES

ional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., 1 2, Texas, or to any Weather Bureau Office near you.

es and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

ed data and corrections will be carried only in the June and December issues of this bulletin.

ly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ons appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

ions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

s otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. ly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

ation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

lerm means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent ob- tions taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining rements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack sult in apparent inconsistencies in the record.

es of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. es of snow on ground include snow, sleet and ice.

n the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. g the summer months some observers take the observations on daylight saving time.

on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground s are at 0600 C.S.T.

e Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes. and are published later in "Hourly Precipitation Data" Bulletin.
H "Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J "Supplemental Data" Table.

OTHER REFERENCE NOTES

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
: And also on an earlier date or dates.
* Amount included in following measurement, time distribution unknown.
e Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
Gage is equipped with a windshield.
R This entry in time of observation column in Station Index means after rain.
B Adjusted to a full month.
D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
S This entry in time of observation column in Station Index means observation made near sunset.
T Trace, an amount too small to measure.
V Includes total for previous month.

al weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

nation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation ory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. ar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price ats.

ription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should de payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, nment Printing Office, Washington 25, D. C.

DATA RECEIVED TOO LATE TO BE INCLUDED IN DIVISION MEANS.

MONTHLY EXTREMES

Highest Temperature: 106° on the 25+ at Two Stations

Lowest Temperature: 42° on the 15th at Mount Locke

Greatest Total Precipitation: 18.41 inches at Freeport 5 NW

Least Total Precipitation: 0.00 at Three Stations

Greatest one-day Precipitation: 10.44 inches on the 18th at Galveston WB City

See reference notes following Station Index.

(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.

See reference notes following Station Index.

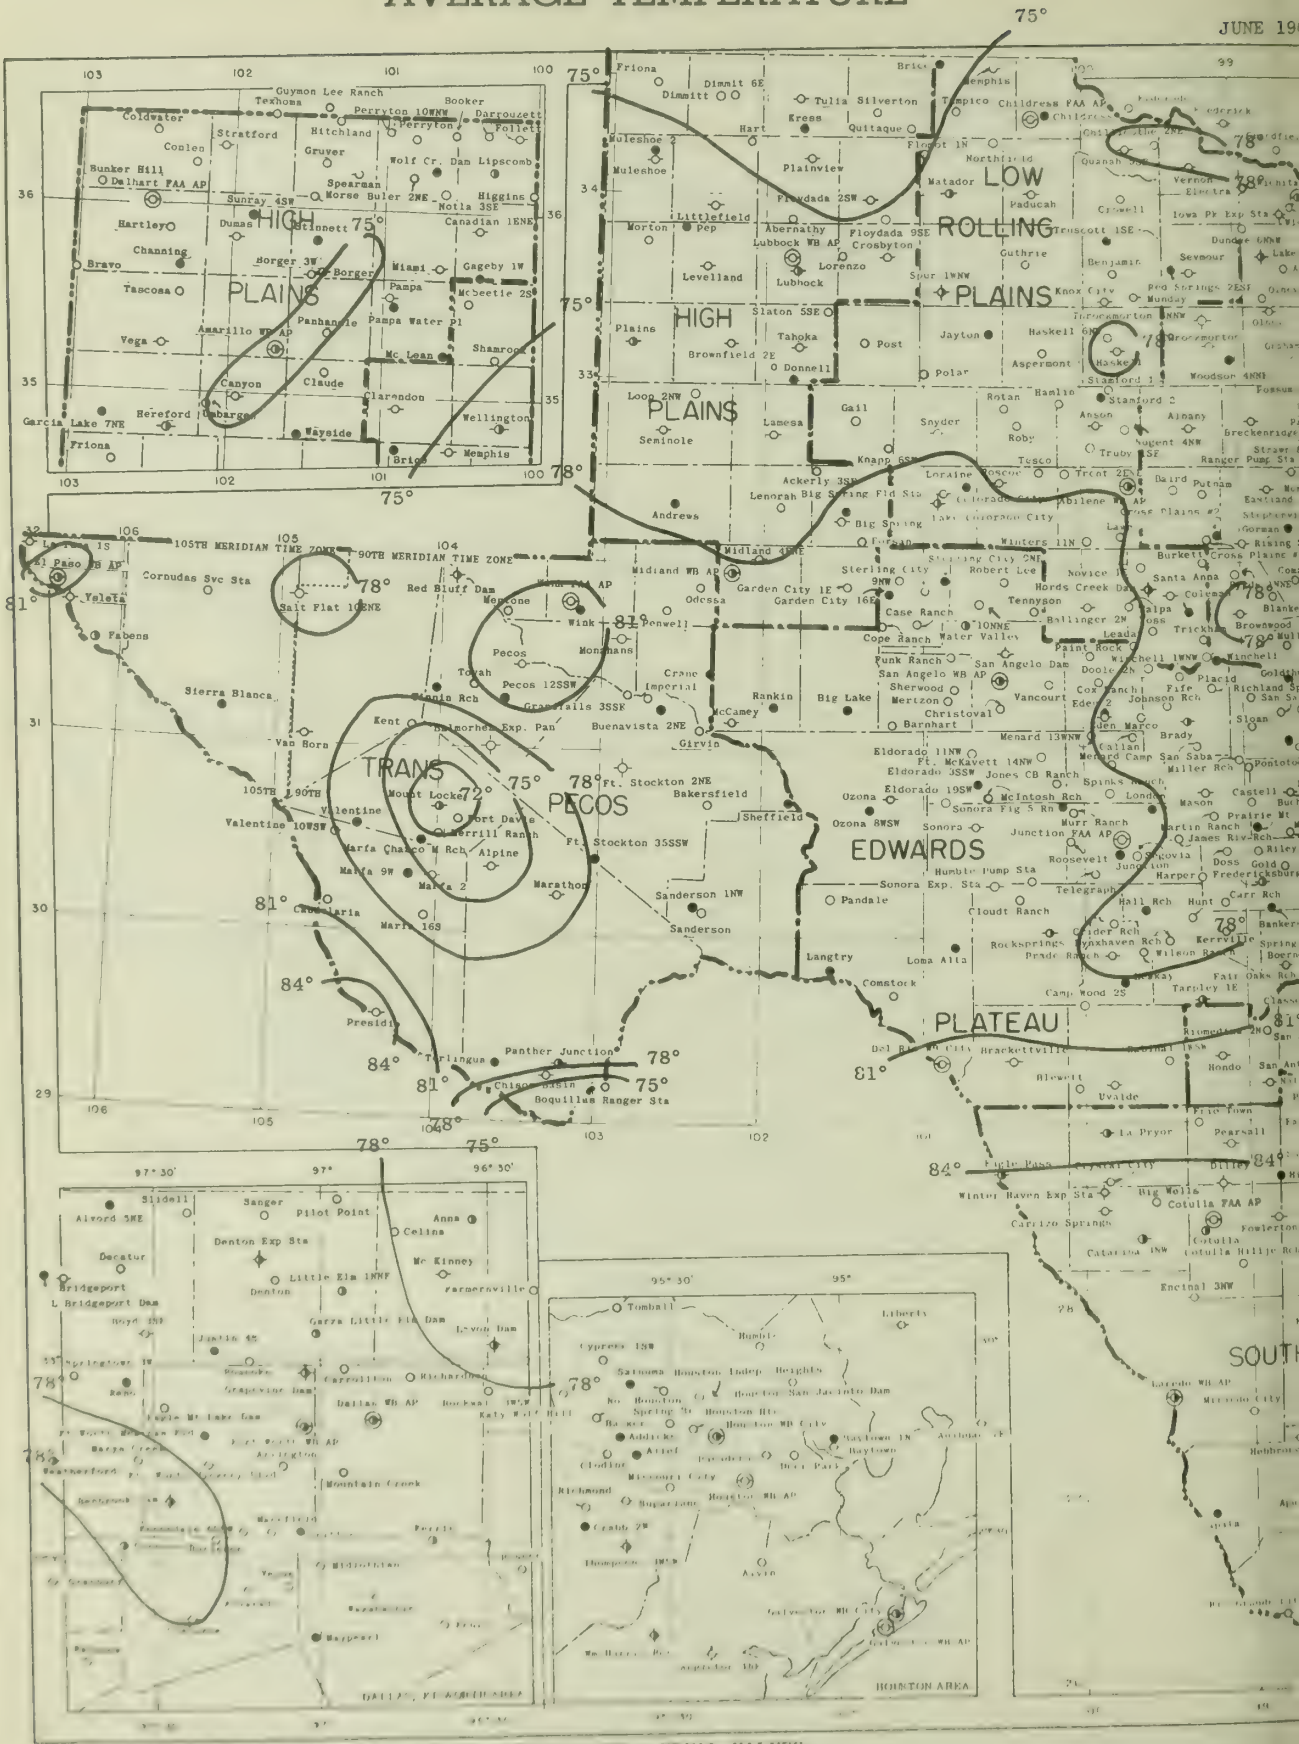
TOTAL PRECIPITATION

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORD STATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

TOTAL PRECIPITATION



JUNE 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

AVERAGE TEMPERATURE

JUNE 19

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

AVERAGE TEMPERATURE

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

REFERENCE NOTES

ditional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., stin 2, Texas, or to any Weather Bureau Office near you.

gures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

layed data and corrections will be carried only in the June and December issues of this bulletin.

nthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

visions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

less otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. nthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

poration is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

ng-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent ob- rvations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

ter equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining surements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack result in apparent inconsistencies in the record.

tries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. tries of snow on ground include snow, sleet and ice.

ta in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and ow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. ring the summer months some observers take the observations on daylight saving time.

ow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground ows are at 0600 C.S.T.

the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

OTHER REFERENCE NOTES

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
'	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

neral weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and ORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

formation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation istory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. milar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price cents.

bscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, vernment Printing Office, Washington 25, D. C.

USCOMM-WB-ASHEVILLE---8-4-61---1600

CORRECTIONS

ANNUAL 1959: CAPPS RANCH, Station Index, should show station closed December.

ANNUAL 1960: Station Index, The following stations should have been carried in the Annual Index for 1960 and shown as closed in March: CHAPPEL, FLYING V RANCH, GOLIAD 6 NE, LEWISVILLE, LILLIAN, NEAL RANCH, and WEBB.

FEBRUARY 1961: HOUSTON WB CITY, Supplemental Data Table, delete Relative Humidity Averages, Midnight through 6:00 p.m.

MAY 1961: BRIDGEPORT, Climatological Data Table, Average Maximum should be 84.2, Average Minimum 60.0, Average 72.1, and Degree Days 19.

BRIDGEPORT, Daily Temperatures Table, Max on the 31st should be 92, Max Average 84.2, Min on the 31st 62, and Min Average 60.0.

ATA RECEIVED TOO LATE TO BE INCLUDED IN DIVISION MEANS.

MONTHLY EXTREMES

Highest Temperature: 107° on the 21+ at Two Stations

Lowest Temperature: 50° on the 26+ at Mount Locke

Greatest Total Precipitation: 14.61 inches at William Harris Resvr

Least Total Precipitation: 0.00 at Salt Flat 10 ENE

Greatest one-day Precipitation: 7.35 inches on the 11th at Robstown

See reference notes following Station Index.

AND MIN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OB OBSERVATION.
EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.
EVAPORATION PAN SCREENED.

See reference notes following Station Index.

TOTAL PRECIPITATION

JULY 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDI
SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA.

TOTAL PRECIPITATION

REFERENCE NOTES

onal information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., n 2, Texas, or to any Weather Bureau Office near you.

es and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

ed data and corrections will be carried only in the June and December issues of this bulletin.

ly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ons appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

ions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

s otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. ly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

ration is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent ob- tions taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining rements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack esult in apparent inconsistencies in the record.

es of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. es of snow on ground include snow, sleet and ice.

in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. g the summer months some observers take the observations on daylight saving time.

n ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground s are at 0600 C.S.T.

e Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.
H "Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J "Supplemental Data" Table.

OTHER REFERENCE NOTES

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
– No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
- And also on an earlier date or dates.
' Amount included in following measurement, time distribution unknown.
Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
Gage is equipped with a windshield.
R This entry in time of observation column in Station Index means after rain.
Adjusted to a full month.
Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
S This entry in time of observation column in Station Index means observation made near sunset.
T Trace, an amount too small to measure.
V Includes total for previous month.

.. weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

mation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation ory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. ar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price nts.

ription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should ade payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, ment Printing Office, Washington 25, D. C.

CLIMATOLOGICAL DATA

TEXAS

AUGUST 1961
Volume 66 No. 8

THE LIBRARY OF THE
OCT 19 1961

ASHEVILLE: 1961

MONTHLY EXTREMES

Highest Temperature: 109° on the 6th at Presidio

Lowest Temperature: 47° on the 23+ at Two Stations

Greatest Total Precipitation: 6.77 inches at Katy Wolf Hill

Least Total Precipitation: 0.00 at Several Stations

Greatest one-day Precipitation: 4.12 inches on the 30th at Smithville

---

Much of the data presented in this publication comes from observations tak by volunteer cooperative observers. These observations are mailed after h close of the month to a Weather Records Processing Center, where they r placed on punch cards and checked for accuracy and completeness. These car are used to prepare copy for the various tables. Printing and mailing i done at the National Weather Records Center at Asheville, North Carolin

The various steps all take time. Records for any state cannot be checked machine until nearly all of them for that state have been received. Print cannot be done until all the tables for an issue are completed and assembl

Constant effort is made to speed up publication and still maintain high qu ity of the data. A realistic deadline for mailing the printed Climatolog Data has been set as the 15th of the second following month (45 days a the end of the month for which data are published). If any recipient's co is unduly delayed, the Director, National Weather Records Center, Ashevil North Carolina should be advised.

SUPPLEMENTAL DATA

TEXAS

MAX AND MIN IN DEGREES FAHRENHEIT TODAY REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.

(A) EVAPORATION MEASURED FROM [illegible] INCH DIAMETER, [illegible] GALVANIZED IRON PAN OF 24 INCH DIAMETER.

(B) WIND [illegible] INCH DIAMETER, [illegible] GALVANIZED IRON PAN.

See reference notes following Station Index.

REFERENCE NOTES

itional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., in 2, Texas, or to any Weather Bureau Office near you.

ires and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

yed data and corrections will be carried only in the June and December issues of this bulletin.

thly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ions appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

sions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956

ss otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. hly degree day totals are the sums of the negative departures of average daily temperatures from 65°F

oration is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

r equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining urements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack result in apparent inconsistencies in the record.

ries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. ries of snow on ground include snow, sleet and ice.

in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and w on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. ng the summer months some observers take the observations on daylight saving time.

on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground es are at 0600 C.S.T.

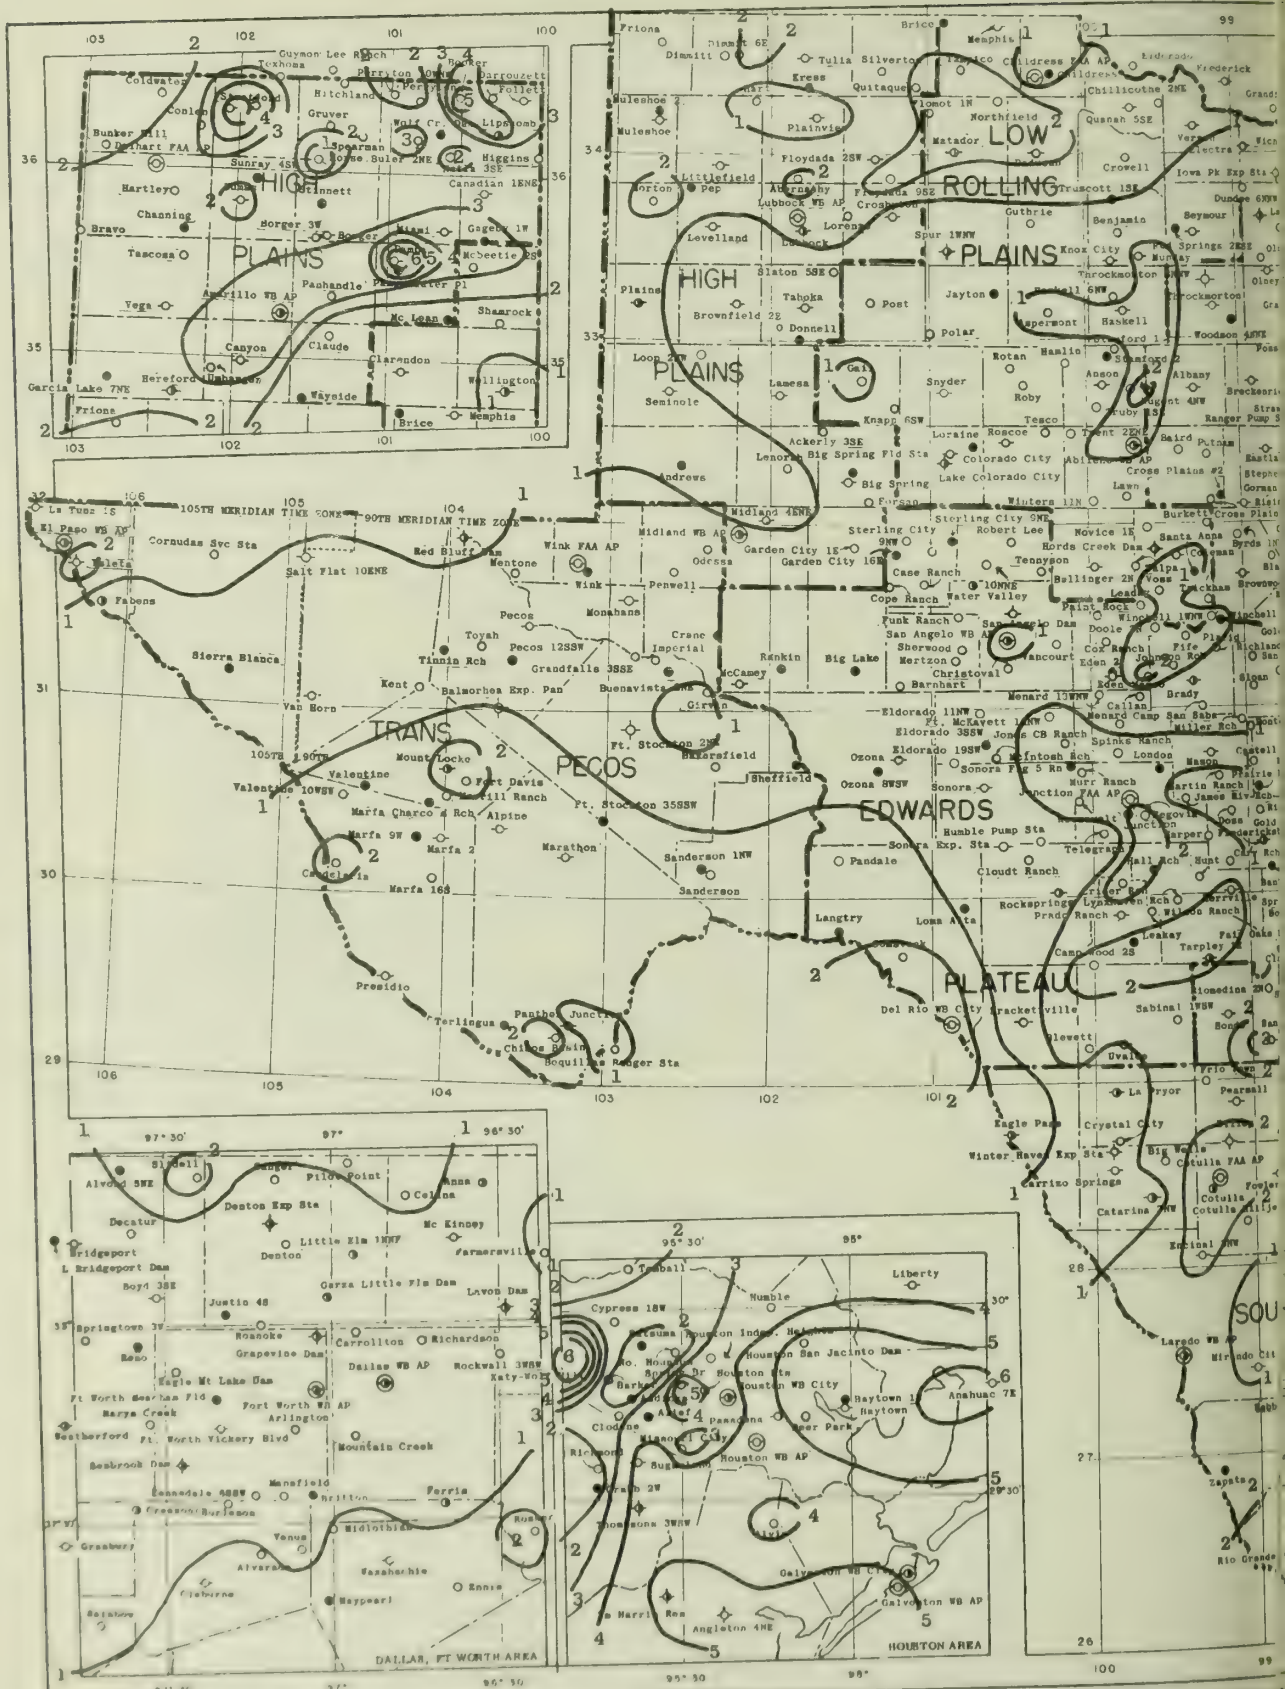
he Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following

C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.
H "Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J "Supplemental Data" Table.

OTHER REFERENCE NOTES

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table and the Station Index.
+ And also on an earlier date or dates.
* Amount included in following measurement, time distribution unknown.
Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
,, Gage is equipped with a windshield.
AR This entry in time of observation column in Station Index means after rain.
B Adjusted to a full month.
D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M One or more days of record missing; if average value is entered, less than 10 days record is missing See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS This entry in time of observation column in Station Index means observation made near sunset.
T Trace, an amount too small to measure.
V Includes total for previous month.

ral weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and M DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.



rmation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation tory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office Washington 25, D. C. for $1.00. lar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price ents.

cription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should ade payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, rnment Printing Office, Washington 25, D. C.

ASHEVILLE: 1961

TEXAS - SEPTEMBER 1961

WEATHER SUMMARY

September weather was featured by hurricane Carla, one of the most violent storms Texas history. Most of the rainfall during the month was associated with this sto and fell from the 8th through the 14th. Heavy rains continued in the lower Rio Gran Valley through the 15th. Dry weather prevailed the last half of the month. Temper tures were generally a little below normal because of cooler air carried southwa behind Carla.

The "eye" of hurricane Carla entered the middle Texas coast in the Port O'Connor are about 2 p.m., September 11. The storm center followed a path over Inez, Yoakum, a Waelder, and near Austin, Waco, and Fort Worth, before crossing into Oklahoma abo 9 p.m. on the 12th.

The storm was one of the worst of the century that opened with the Galveston disast of 1900 in which 6,000 people died. In this hurricane with its associated tornadoes lives were lost and at least 465 others were injured. The unusually small number fatalities was the direct result of timely Weather Bureau warnings and the order and effective evacuation of nearly half a million people.

Property loss is estimated at 200 million dollars, with an additional 100 million doll loss to crops. Most damage was inflicted to coastal counties between Corpus Chris and Port Arthur, plus the inland counties of Jackson, Harris, and Wharton. Torrenti rains of more than 16 inches fell in a narrow coastal belt from Galveston to Bay Cit in the northeast quadrant of the hurricane. Bay City reported a storm total of 17.2 inches. More than 13 inches accompanied the storm as far as 130 miles inland, in very irregular pattern. In general, rainfall gradually decreased northward, away fr the coast, with most of northeast Texas, east of the storm center, receiving as mu as 4 inches. Most Gulf drainage streams east of the storm track reached, or exceed flood stage.

In the wake of hurricane Carla, a cold front moved through the Lower Rio Grande Val on September 13-14, setting off severe thunderstorms, and producing rains of over inches in the Brownsville area, September 14-15. The heavy rains in the Brownsvi area caused considerable flooding, but little damage except to streets.

For detailed information, especially on hurricane Carla, the reader is referred STORM DATA, CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and WEEKLY WEATHER AND CROP B LETINS, for September.

Austin 2, Texas

MONTHLY EXTREMES

Highest Temperature: 107° on the 14th at Rio Grande City 2 ESE

Lowest Temperature: 34° on the 25th at Stratford

Greatest Total Precipitation: 19.99 inches at Bay City Waterworks

Least Total Precipitation: 0.00 at Two Stations

Greatest one-day Precipitation: 11.00 inches on the 12th at Giddings

MAY BE USED TO DATE EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION READ FROM A SCREEN SCREENED PAN OF 24 INCH DIAMETER.
(F) ALTERNATE 3 FOOT FOURTH INCH THICK) EVAPORATION PAN

See reference notes following Station Index.

REFERENCE NOTES

ditional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist, 3600 Manor Road, Austin 2, Texas, or any Weather Bureau Office near you.

gures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

layed data and corrections will be carried only in the June and December issues of this bulletin.

nthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

visions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

less otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. nthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

aporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

ng-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

ter equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining asurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack y result in apparent inconsistencies in the record.

tries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. tries of snow on ground include snow, sleet and ice.

ta in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and ow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. ring the summer months some observers take the observations on daylight saving time.

ow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground lues are at 0600 C.S.T.

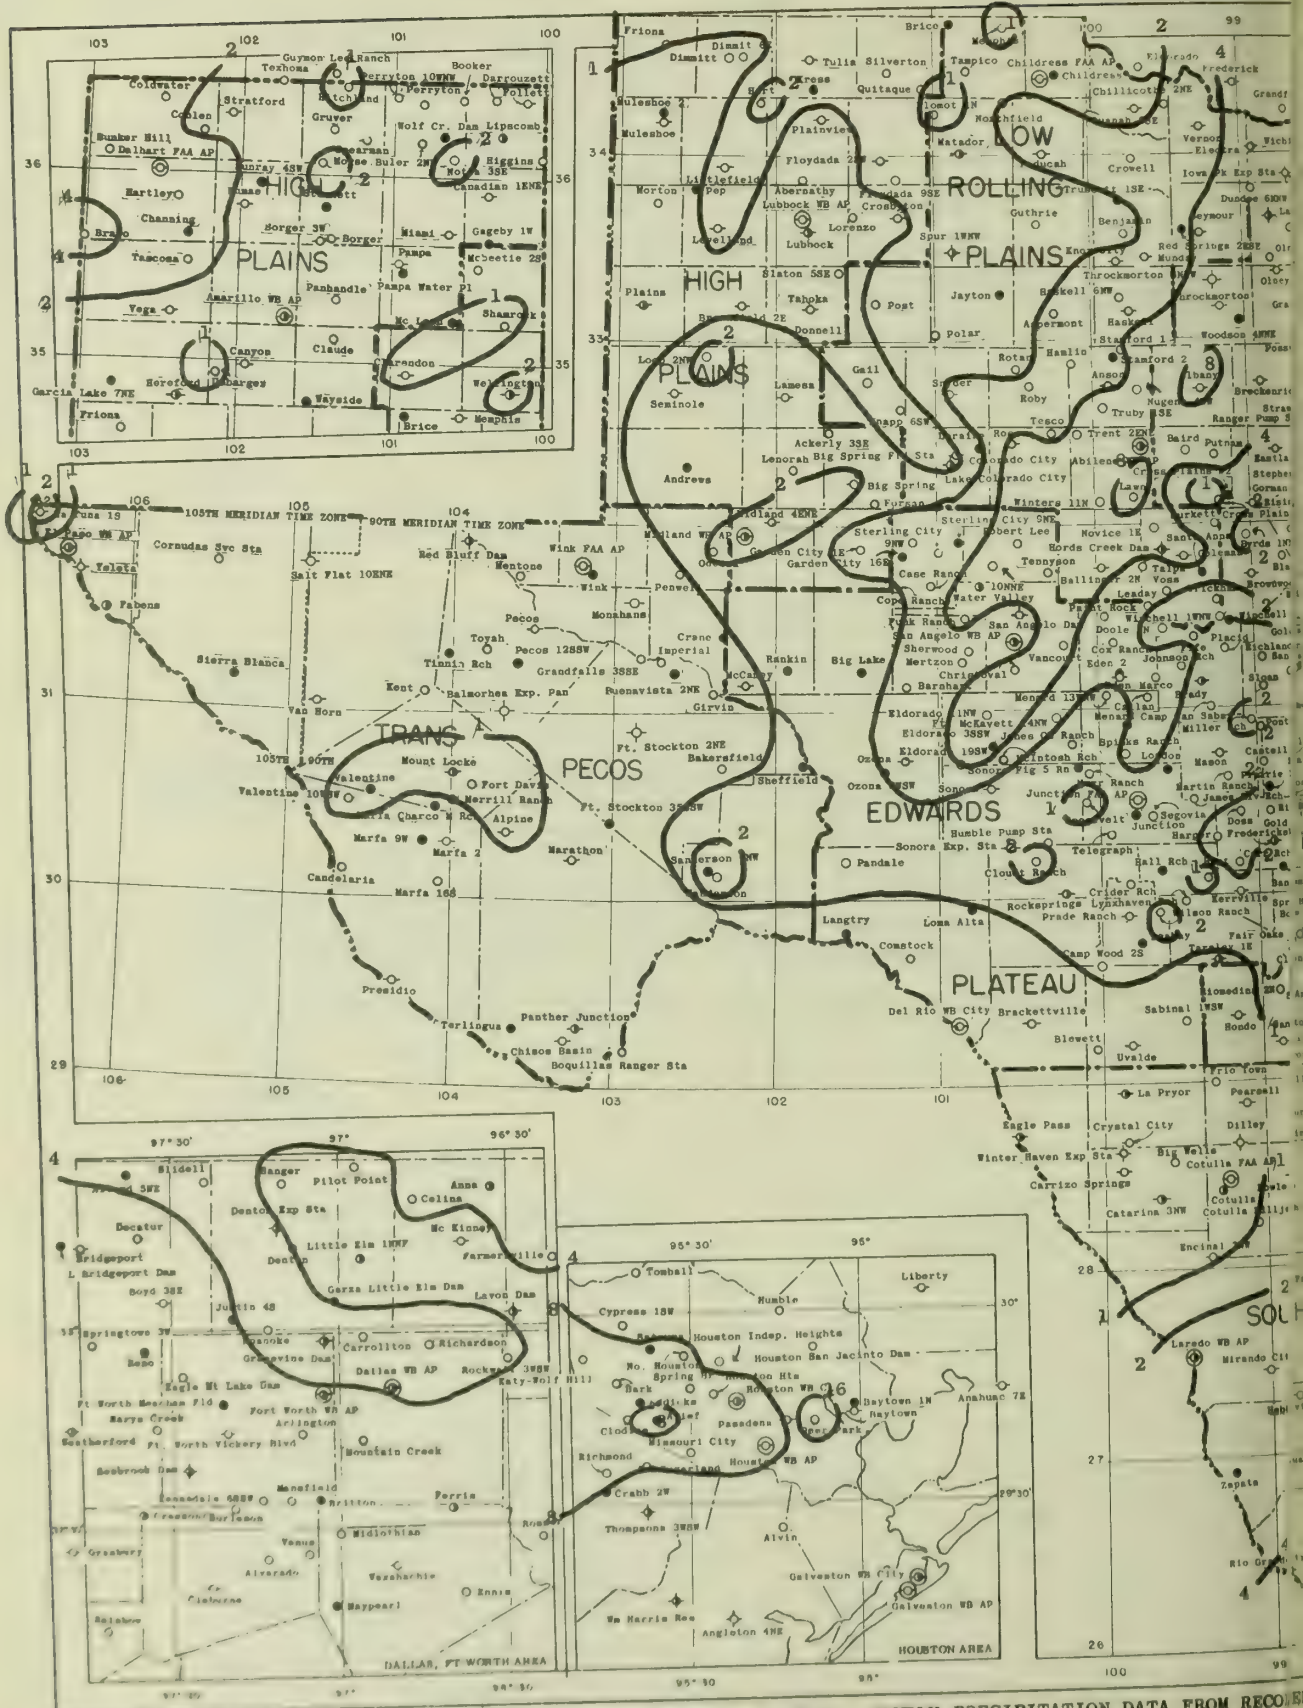
the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Recording Rain Gage Station. Hourly precipitation values are processed for special purposes. and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

OTHER REFERENCE NOTES

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

neral weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and ORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.



iformation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation istory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. milar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price cents.

bscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, vernment Printing Office, Washington 25, D. C.

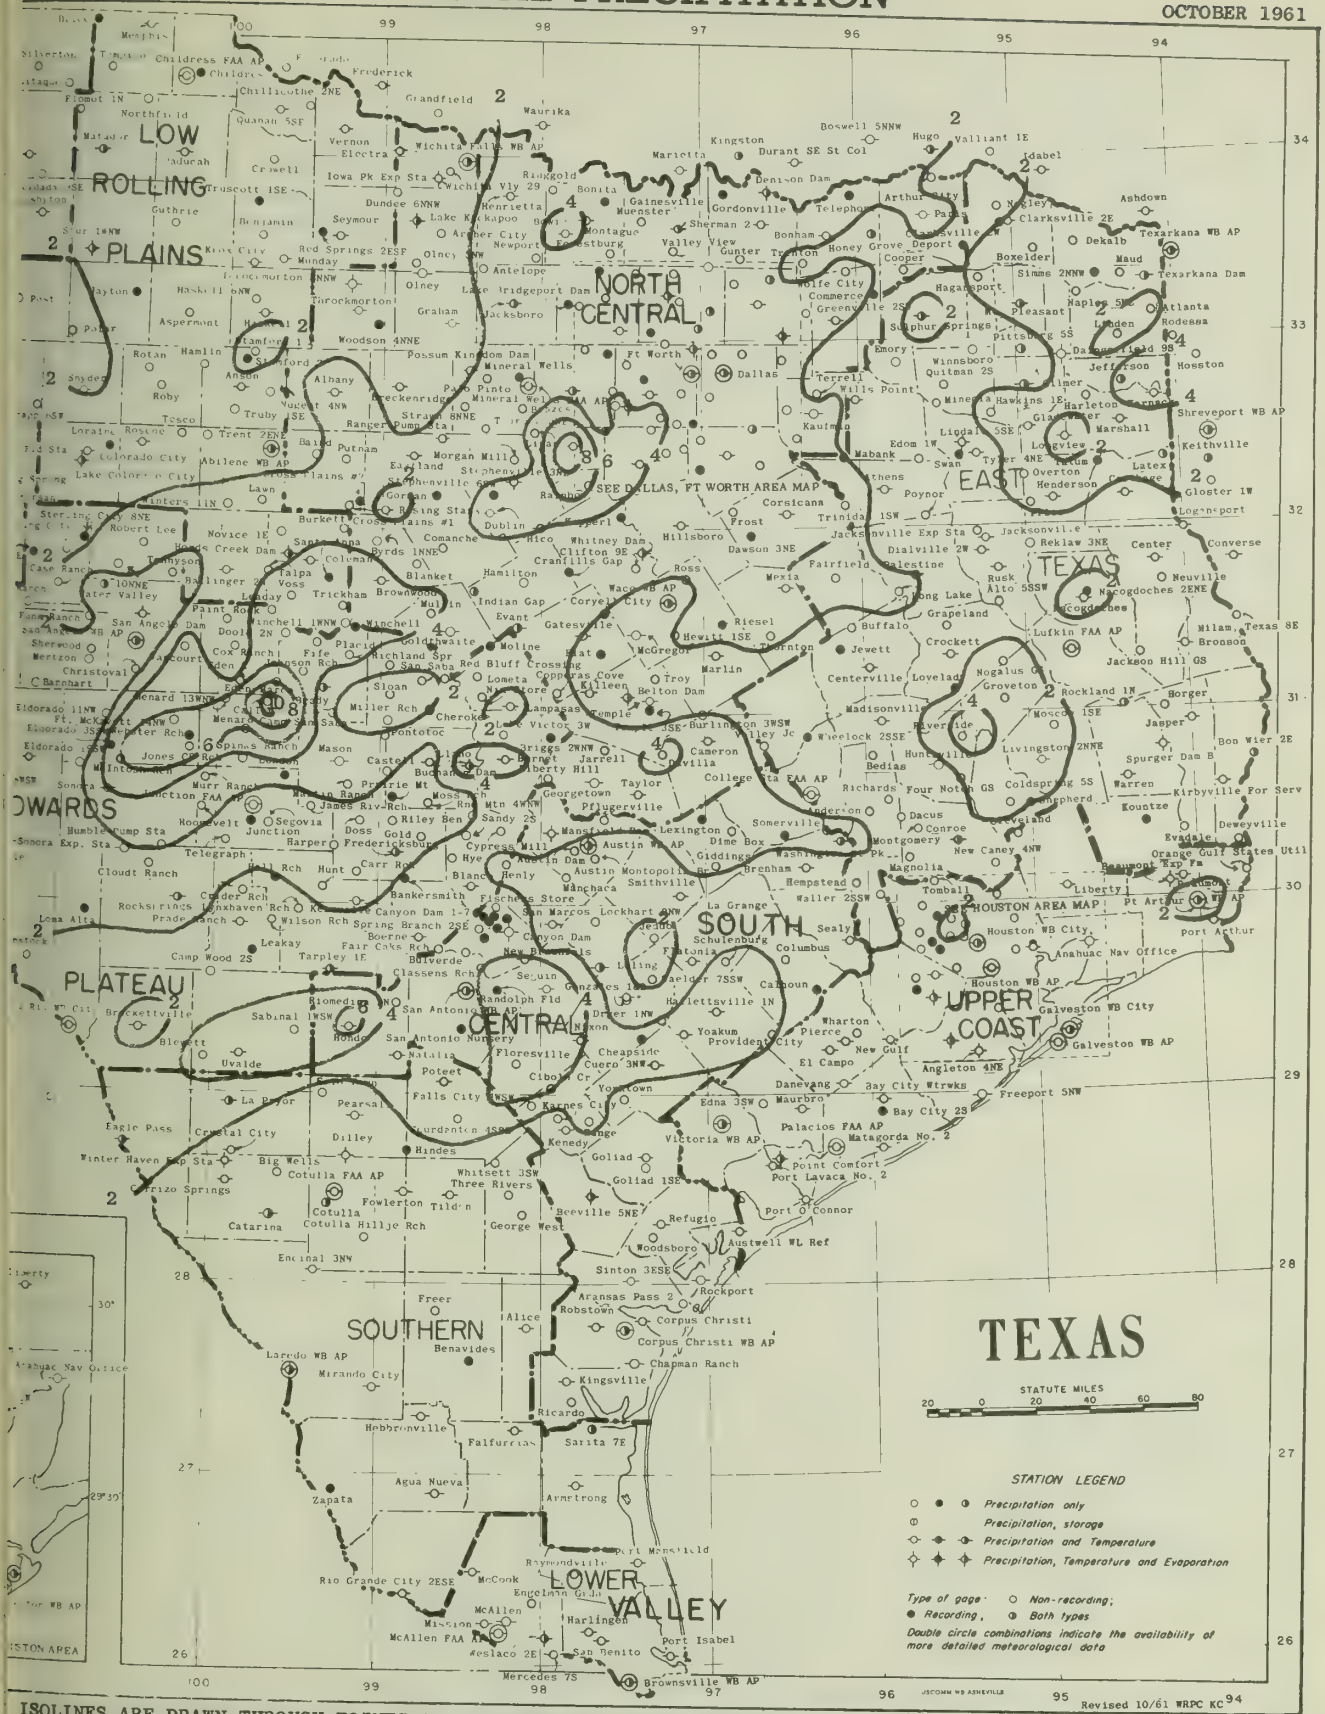
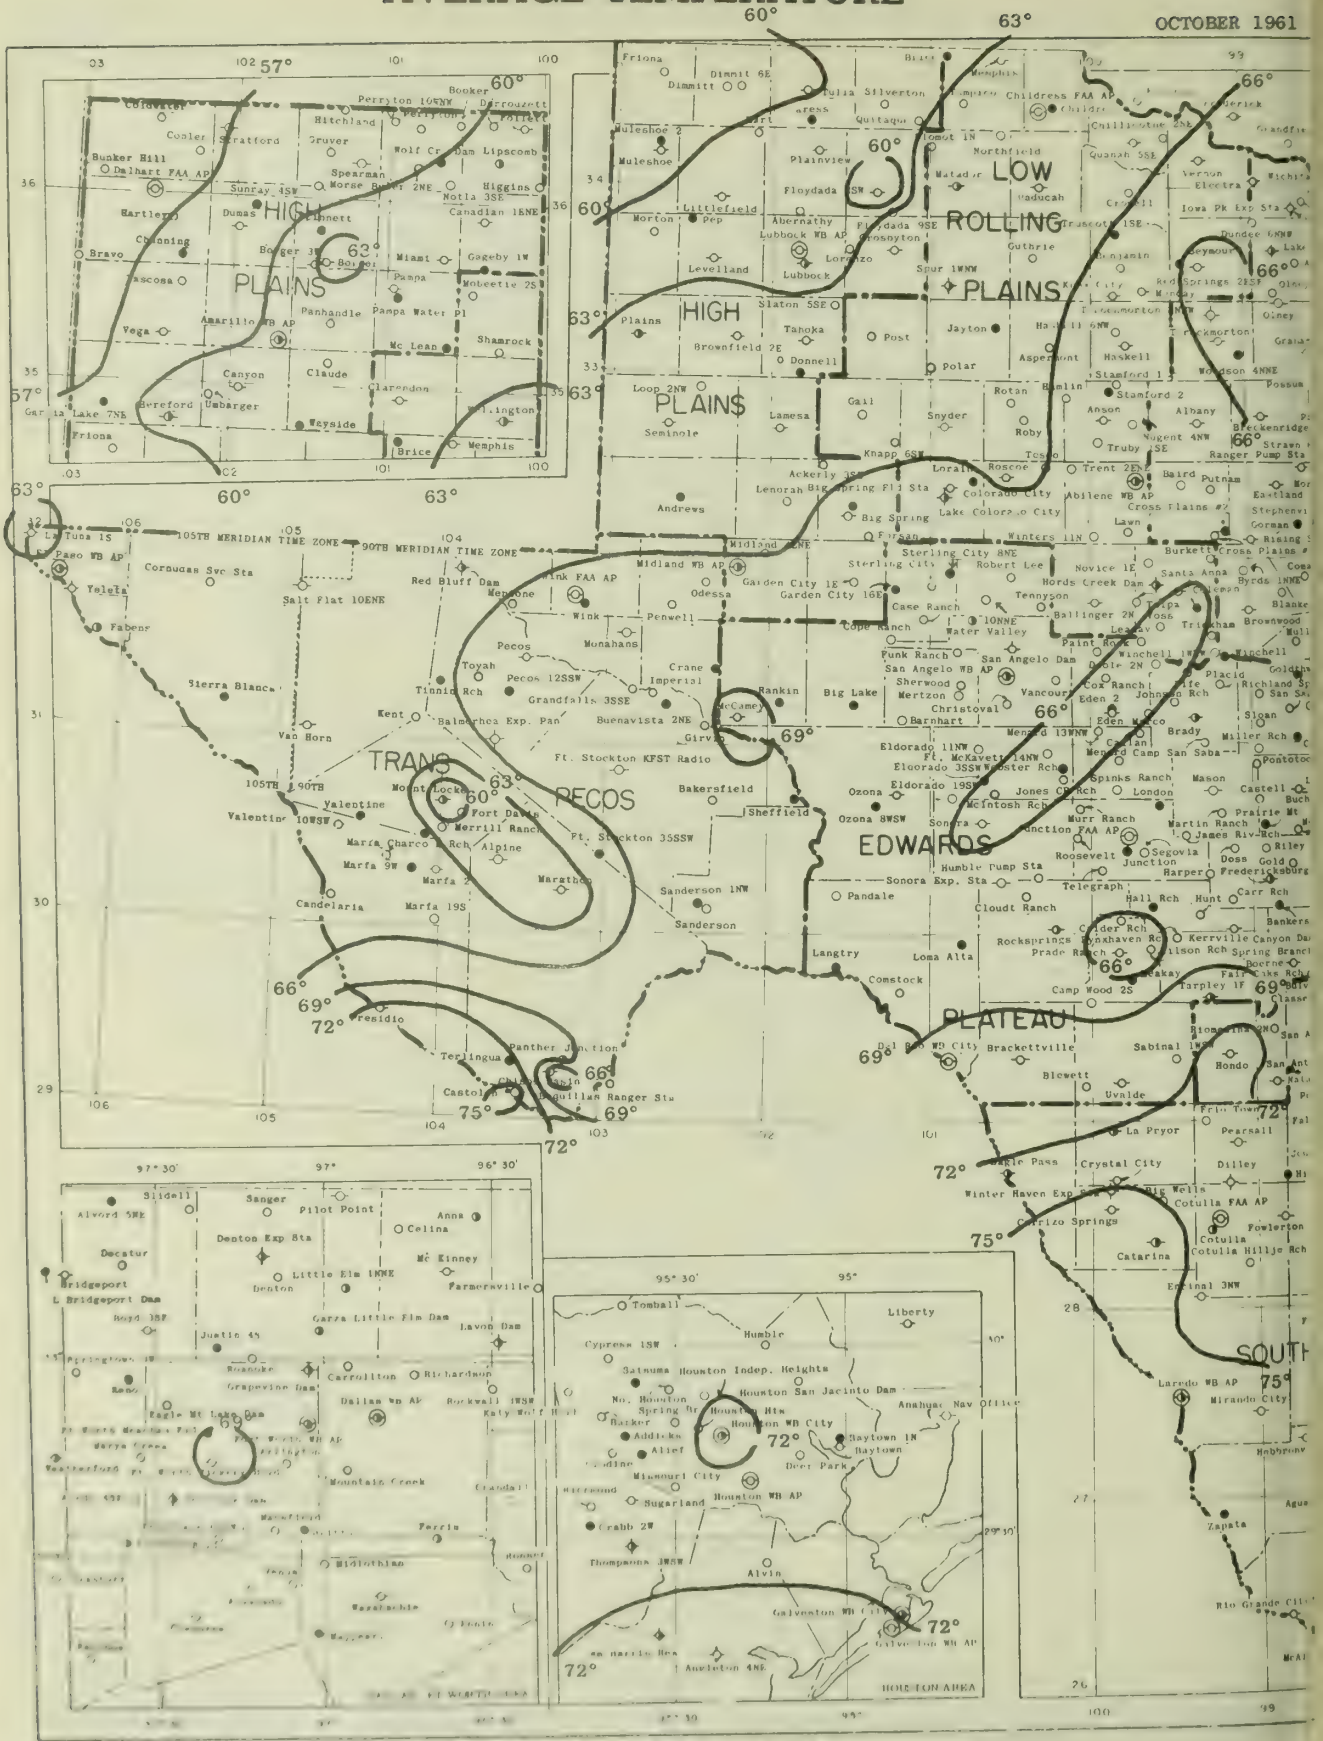
MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.



See reference notes following Station Index.

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

TOTAL PRECIPITATION



OCTOBER 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

AVERAGE TEMPERATURE

OCTOBER 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

AVERAGE TEMPERATURE

OCTOBER 1961

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES.

REFERENCE NOTES

ditional information regarding the climate of Texas may be obtained by writing to the Weather Bureau State Climatologist, 3600 Manor Road, Austin 2, Texas, or
any Weather Bureau Office near you.

gures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

layed data and corrections will be carried only in the June and December issues of this bulletin.

nthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

ations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

visions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

less otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles.
nthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

aporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

g-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent ob-
vations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

er equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining
surements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack
result in apparent inconsistencies in the record.

ries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet.
ries of snow on ground include snow, sleet and ice.

a in the "Monthly Extremes" Table; "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table; and snowfall in the "Snowfall and
w on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time.
ing the summer months some observers take the observations on daylight saving time.

w on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground
ues are at 0600 C.S.T.

the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes. and are published later in "Hourly Precipitation Data" Bulletin.
H "Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J "Supplemental Data" Table.

OTHER REFERENCE NOTES

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
\- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
\+ And also on an earlier date or dates.
* Amount included in following measurement, time distribution unknown.
\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
" Gage is equipped with a windshield.
AR This entry in time of observation column in Station Index means after rain.
B Adjusted to a full month.
D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS This entry in time of observation column in Station Index means observation made near sunset.
T Trace, an amount too small to measure.
V Includes total for previous month.

eral weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and
M DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

rmation concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation
tory" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00.
lar information for regular Weather Bureau stations may be found in the latest annual issues of Local Climatological Data, obtained as indicated above, price
ents.

cription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should
ade payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents,
rnment Printing Office, Washington 25, D. C.

TEXAS - NOVEMBER 1961

WEATHER SUMMARY

Cold, cloudy, wet weather dominated the State during the month of November. peratures were below normal and, among major cities, only Corpus Christi, repo below normal rainfall.

Freezing temperatures, rain, and some localized snow flurries swept the Panha on November 2 and 3. From the 13th to 14th, the earliest heavy snow on record in extreme West Texas. El Paso received 7.8 inches of snow on the 13-14th, heaviest November snowfall in 55 years. From 4 to 20 inches of snow fell in Panhandle and western portion of the South Plains from the 13th to 15th. Free rain left a heavy accumulation of ice in the eastern Panhandle and central eastern portions of the South Plains. Damage was particularly heavy to tree the area, as they had not yet lost their leaves.

Excessive thunderstorm rains fell in Southeast Texas on the 12th and 13th, in Northeast Texas on the 21st and 22d. Port Arthur received 7.26 inches, Gal ton 7.66 inches, and Houston 5.42 inches within 24 hours on the 12-13th. M flooding occurred on the middle and lower portions of the Guadalupe, and on Lavaca and Navidad on the 14th. Flooding occurred along Chambers and Rich Creeks near Corsicana, and on Aquilla Creek near Aquilla, on the 22d. The Sul exceeded flood stage at Naples from November 28 through December 2.

The weather was unusually violent for November. Tornadoes moved through East South Texas on the 2d and again on the 22d. A rapidly moving line of thunderst on the 22d released damaging hail in Central Texas and spawned a series of dest tive tornadoes in the East Texas counties of Nacogdoches and Gregg. One pe died and ten were injured in a tornado near Cushing. A total of nine tornadoes one waterspout occurred during the month.

Outdoor operations were limited by the cold, wet weather, and crop harvest was back for four consecutive weeks. Cotton and grain sorghum harvest on the Plains was two to three weeks behind schedule at the end of the month.
